DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-12, prior arts do not disclose a gateway for transmitting data packets between a wireless network and a second network, the gateway comprising a combination of:

- (1) a header builder receiving data packets from the wireless network without a header suitable for the protocol of the second network and building the suitable header based on the data and information contained within the data packets received, and outputting data packets with the suitable header for transmission on the second network; and
- (2) a database manager collecting information from the data packets received from the at least one wireless terminal in order to build up and maintain the database.

Regarding claims 13-16, the prior arts do not disclose a wireless terminal for transmitting wireless packets over a wireless network, the wireless terminal comprising a combination of:

- (1) a header manager transmitting header information for a particular destination on a second network, and, the wireless packets to the wireless network without a header suitable for a protocol used on a second network;
- (2) a relay module collecting the data packets, not having a header suitable for the protocol, from the wireless network to build a data packet with a header suitable for the protocol using the data.
